II. CODE COMPLIANCE/VIOLATION ISSUES

Describe any known open or active code compliance/violation issues on the proposed project site. Indicate related Violation Numbers. If no open or active code compliance/violation issues are present or known, please state "NONE" or "UNKNOWN", as appropriate. (Use additional sheets if necessary):

PROJECT DESCRIPTION

III. FEATURES OF THE PROJECT (Note: Filling out Sections IV. and VII. of this form may help in completing a full project description)

DESCRIBE IN DETAIL the features of the project. This description should adequately reflect the construction and development (for example, grading) as well as the ultimate use and intention of the site (for example, a 40,000 sq. ft. industrial facility). The narrative must be supplemented by a project plan or map of appropriate scale and legibility.

- Include technical aspects of the project such as the considerations of land use, density and intensity, engineering requirements, and visual or aesthetic features.
- Include environmental constraints or characteristics, or compliance with environmental regulations/policies which may have influenced the initial project design such as avoidance of geologic hazards known to the site, steep topography, avoidance of impacts to sensitive resources (for example biological, natural, water, cultural), compliance with the Resource Protection Ordinance, storm discharge requirements, Air Pollution Control District (APCD) permit requirements, project accessibility, hazards (for example floodway avoidance, noise buffering), etc.
- Include description of all the stages of project development that could cause physical changes in the environment including construction, operation and maintenance.
- If the project will be phased, the anticipated phasing schedule should be described.
- Include the objectives of the proposal in a discussion that identifies why the applicant is undertaking the proposed project (for example, provision of housing or commercial services, reduction in traffic congestion, reduction of a flood hazard at a reasonable cost).

Lack of detail may result in project delay and the requirement to resubmit a more detailed project description.

(Use additional sheets if necessary):

The project proposes developing a one-story self-storage facility at 1305 E. Mission Road (APN: 105-410-018) in Fallbrook, CA. The project will consist of modular self-storage units and a small office building across 8 buildings totaling 102,804 square feet of floor area. Vehicular access is provided along an existing access road (off of East Mission Road) within a north-south easement abutting the western property boundary. The project proposes paving a private road within this access easement. A 24-foot-wide fire lane loops around the interior buildings of the site. Additionally, the project proposes two detention basins on the northernmost portion of the site.

The subject property is zoned Limited Industrial (M52) and falls under the General Plan designation of Limited Impact Industrial. The site area is +/- 5.37 acres (per San Diego County APN). The height limit of the M52 zone is 35 feet or two stories. The project proposes 41 parking spaces, while 15 are required. There is no caretaker unit for which to provide parking. Thirty-four parking spaces are situated parallel to and between fire lanes and buildings. Three 90-degree stalls, including two accessible stalls, are located by the office building. Four more 90-degree stalls are provided throughout the site.

The site is unimproved, with scattered trees and other vegetation.

The subject property is designated in the General Plan for Limited Impact Industrial land use and has a General Plan Regional Category of "Village" being within the Fallbrook Community Planning area.

Development of the property is subject to Special Area regulations: Community Design Review Area (section 5750-5799) and Airport Land Use Compatibility Plan Area (section 5250-5260).

Site Plan review is required due to the Fallbrook Community Design Review Special Area regulation, including completion of a Design Review Checklist.

The project is not served by a water or sanitary waste facilities, therefore an on-site well and sanitation / waste-water system may be required. Fire service is provided by the North County Fire Protection District. School service is provided by the Fallbrook Union School Districts.
