PROJECT DESCRIPTION

III. FEATURES OF THE PROJECT *(Note: Filling out Sections IV. and VII. of this form may help in completing a full project description)*

DESCRIBE IN DETAIL the features of the project. This description should adequately reflect the construction and development (for example, grading) as well as the ultimate use and intention of the site (for example, a 40,000 sq. ft. industrial facility). The narrative must be supplemented by a project plan or map of appropriate scale and legibility.

- Include technical aspects of the project such as the considerations of land use, density and intensity, engineering requirements, and visual or aesthetic features.
- Include environmental constraints or characteristics, or compliance with environmental regulations/policies which may have influenced the initial project design such as avoidance of geologic hazards known to the site, steep topography, avoidance of impacts to sensitive resources (for example biological, natural, water, cultural), compliance with the Resource Protection Ordinance, storm discharge requirements, Air Pollution Control District (APCD) permit requirements, project accessibility, hazards (for example floodway avoidance, noise buffering), etc.
- Include description of all the stages of project development that could cause physical changes in the environment including construction, operation and maintenance.
- If the project will be phased, the anticipated phasing schedule should be described.
- Include the objectives of the proposal in a discussion that identifies why the applicant is undertaking the proposed project (for example, provision of housing or commercial services, reduction in traffic congestion, reduction of a flood hazard at a reasonable cost).

Lack of detail may result in project delay and the requirement to resubmit a more detailed project description.

(Use additional sheets if necessary):

The project is located in the Fallbrook Community Plan, in a Semi-Rural General Plan Regional Category. In accordance with the General Plan Land Use Designation SR-4 1 Du/ 4 Ac., The project will create 3 Parcels, being their areas as follows: Parcel 1, Gross Area of 4.09 Ac, Net Area of 4.01 Ac., Parcel 2 Gross Area of 4.49 Ac, Net area of 4.18Ac., Parcel 3, Gross Area of 4.89 Ac., Net Area of 4.20 Ac. Legal access to each Parcel will be through a private driveway that will connect to India Lane (pvt.) which connects to Stewart Canyon Road (public). The proposed pads were designed to avoid encroaching any steep slopes or sensitive resources.
